

BECOME A PROJECT ACCESS PROVIDER

Project Access is a specialty care referral network administered by the Primary Care Coalition (PCC). It is composed of a dedicated group of health care specialists like you, as well as local hospitals and diagnostic facilities working together to provide specialty care to low-income, uninsured residents of our community.

“

More than **120** Project Access
specialty providers serve
1,500 patients annually.

*Honestly, we love to work with Project Access. The Project Access
staff are awesome.*

*They're on top of things and
make everything easier.*

”

– Michelle, Specialty Care Office Manager

100% of surveyed providers
would recommend participating in
Project Access to other clinicians.

8757 Georgia Ave, 10th Floor, Silver Spring, MD 20910

By treating a manageable number of Project Access patients in your own office, you can improve the health and lives of our most vulnerable residents and help improve the health of our community as a whole.

We're here to make caring for patients easier.

Once you've agreed to accept Project Access patients, we will call your office to schedule patient appointments, and then send you referrals for those appointments, including relevant clinical information. We work with primary care providers to confirm appointments and assure that patients arrive on time and prepared for their visits with you. You can always reach us with questions, concerns or suggestions:

1. For Project Access clinical issues/questions

SpecialtyNurse@PrimaryCareCoalition.org | 301-628-3426

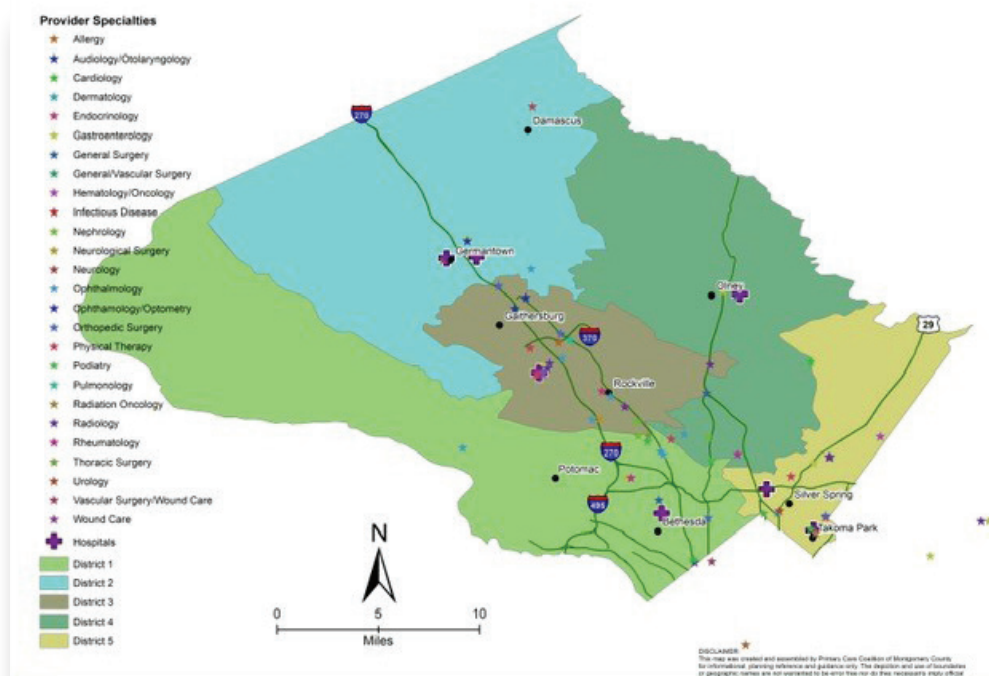

2. For Project Access scheduling issues/questions
